

## Equipment Report 5<sup>th</sup> Oct 2022.

We now have large quantity of stakes and large and small kites largely thanks to Jon Eaton. They are returned on time and this gives us the opportunity to sort out any problems. The caravan is kept at Liz Elliott's and will last another year. We are expecting new Si boxes which will require modifying our stock of stakes. Hopefully these will be used for the summer evening events. There will be 30 Si boxes in the planners kit so if you are planning, hopefully you will stick to 30 controls excluding start and finish boxes. Alan Irving has put in a lot of hours on the old boxes culminating in the Lakes 5 day when all the clubs equipment was out on the fell with no problems. Lynne Thomas has the school and training gear and as far as possible this is kept separate as it reduces the risk of not knowing where everything is. Considering how we operate it is amazing that in the last 3 years we have lost only one Si box (stolen) but then a box was found on Powter How while controls were being put out for an event. It was one I had dropped 6 years before, it still worked and had lost 2 hours on the clock.
