

WCOC Grants Policy 2025

Club members are welcome to apply for individual grants to subsidise the cost of the following:

- 1) GB or National representation at international competitions at junior and senior level
- 2) To subsidise individuals selected for British Orienteering and JROS training camps
- 3) Home Country representation at Interland or Home International competitions for junior, senior and veteran competitors.

Individual grants should ideally be applied for in advance as soon as the costs are known. However, they will still be considered if the claim is received after the event, if the competitor is waiting for the final cost from British Orienteering or JROS. They should then be sent as soon as the costs are known.

If the grant meets the above criteria it can be considered by both the chair and treasurer, without having to be considered by the committee. Such grants will be paid at the current rate, approved at a committee meeting. Currently this is 20% of all costs for both National and International tours and competitions. If the committee approves a different reimbursement level for a year, then the chair and treasurer will be able to approve the grant claims again without it going to the committee.

Grants will be considered for a higher proportion of funding than the current approved rate and for events that fall outside of the activities listed above, but these will have to be considered by the committee (either by email or in a meeting).

The club asks that those in receipt of a grant, offer some feedback to the Club. For example, an email to the committee, or written article for the newsletter.
