Northern Fells Xmas Tree challenge

Thanks to my nifty Xmas Elves the **Northern Fells Xmas Tree challenge** is ready for your orienteering and fell running pleasure. There are small 6 Xmas trees placed out on the fells at the grid references shown. You must visit each tree (in any order) and complete a circuit from your car parking start point. You can choose to start from wherever you wish, but you must complete a circuit back to your car. You may run the route with others or alone. Remember to take with you enough gear to keep yourself safe in the fells, weather can change rapidly in winter, and you do the challenge at your own risk. To prove you have been to each location you must provide a photo of each tree. Submit your time or strava route to natalie@razzetti.com or on messenger/facebook.. The fastest circuit will be awarded a small prize.

Partridge in a Pear Tree **355 305** Large Stone

Two Turtle Doves **302 360** Shaft entrance

Three French Hens **336 312** Large boulders/crags

Four Calling Birds **312 337** Lingy Hut

Five Golden Rings **339 305** Wall of shelter

Six Geese a-Laying **295 341** Cairn

For those wanting an extra twist you can do the challenge in the dark, some of the trees have little lights. (But please turn them off before you leave).

You may also do either a long or a short circuit. The long is all six. The short circuit is the following four only:

355 305

336 312

312 337

339 305

Happy days mapping and route finding. The route will be out until mid January.

Natalie
